

Option to Acquire 1.5mtpa Milling Facility Exercised

Black Cat Syndicate Limited (“Black Cat” or “the Company”) is pleased to advise that after due diligence the exclusive option to acquire a 1.5mtpa milling facility (comprised of two mills) for the Kal East Gold Project (“Kal East”) has been exercised (“Option”).

Black Cat plans to construct a processing facility at the Kal East Gold Project during 2021. The processing facility will be centrally located near the Imperial/Majestic deposits, ~50kms east of Kalgoorlie. The traditionally configured gravity and CIL gold plant will be ideally suited to Black Cat’s deposits and potentially any third party free milling ores in the region. Black Cat intends to install one of the two mills initially, reserving the second for future milling capacity expansion.

HIGHLIGHTS

By exercising the exclusive option, Black Cat has committed to acquire a 1.5mtpa milling facility inclusive of associated equipment for a total of \$1.24m of which \$0.1m has been paid.

Equipment within the Option include:

- 1.85MW Outokumpu ball mill (1) and 1.45MW Outokumpu ball mill (1);
- Infrastructure surrounding the mills including steel columns, floor grating and stairs;
- All related ball mill auxiliaries including motors, trunnion, lube systems, trommels and pipe work;
- All critical ball mill spares including trunnion bearings, pinion shafts and gearbox; and
- Other ancillary equipment including a 60t lime silo.

Further details of the Option and the equipment are set out in the announcement of 1 March 2021.

Black Cat’s Managing Director, Gareth Solly said: *“The milling facility is ideal for our planned processing facility and includes sufficient grinding capacity for potential future expansion. Due diligence by a team of experts has confirmed that the facility was operated for less than five years, has been well maintained and is in excellent condition. We are currently estimating the impact this milling facility has on our construction schedule and construction cost estimates for both the initial facility as well as the potential expansion case.”*

Option to Acquire 1.5mtpa Milling Facility Exercised

Acquisition Terms

Now that the Option has been exercised the following consideration is payable by Black Cat:

- a. In respect of the Equipment Option, the amount of \$1,000,000 is payable within 14 days from the date the Equipment Option is exercised and a further amount of \$100,000 is payable within 14 days of the full removal of the Mill Equipment and the Mill Infrastructure; and
- b. In respect of the Ancillary Option, the amount of up to \$36,000 is payable within 14 days from the date the Ancillary Option is exercised. A further amount of up to \$4,000 is payable within 14 days of the full removal of the Ancillary Equipment.

In addition, the equipment has been acquired on the basis that it is the responsibility of Black Cat to remove it from site before 30 September 2021.

Option to Acquire 1.5mtpa Milling Facility Exercised

ABOUT BLACK CAT SYNDICATE (ASX: BC8)

Black Cat's Kal East Gold Project comprises 756km² of highly prospective tenements to the east of the world class mining centre of Kalgoorlie, WA. The Project contains a combined JORC 2012 Mineral Resource of 14.3Mt @ 2.2 g/t Au for 1,025,000oz.

Black Cat plans to construct a central processing facility for the Kal East Gold Project. The processing facility will be located near the Imperial/Majestic deposits, ~50kms east of Kalgoorlie. This location is well suited for a processing facility and sits within a short haulage distance of the bulk of Black Cat's Resources. The processing facility is designed to be a traditional Carbon-In-Leach gold plant which is ideally suited to Black Cat's Resources as well as to third party free milling ores located east of Kalgoorlie.

Black Cat's extensive tenement package contains a pipeline of projects spanning from exploration targets on new greenstone belts, Resource extensions around historic workings and study work for the definition of maiden Ore Reserves.

Black Cat is actively growing and increasing confidence in the current Resource with an ongoing drilling program underway and delivering results.

The Company confirms that it is not aware of any new information or data that materially affects the information in the original reports, and that the form and context in which the Competent Person's findings are presented have not been materially modified from the original reports.

Where the Company refers to the Mineral Resources in this report (referencing previous releases made to the ASX), it confirms that it is not aware of any new information or data that materially affects the information included in that announcement and all material assumptions and technical parameters underpinning the Mineral Resource estimate with that announcement continue to apply and have not materially changed.

The preceding statements of Mineral Resources conforms to the 'Australasian Code for Reporting of Exploration Results Mineral Resources and Ore Reserves (JORC Code) 2012 Edition'. All tonnages reported are dry metric tonnes. Minor discrepancies may occur due to rounding to appropriate significant figures.

Notes on Resource table for the Kal East Gold Project:

1. Data is rounded to thousands of tonnes and thousands of ounces gold. Discrepancies in totals may occur due to rounding.
2. The Resource estimates are produced in accordance with the 2012 Edition of the Australian Code for Reporting of Mineral Resources and Ore Reserves (the "2012 JORC Code").
3. All tonnages are reported in dry metric tonnes.
4. Resources have been reported as both open pit and underground with varying cut-offs based off a number of factors discussed in the corresponding Table 1 which can be found with the original ASX announcements for each Resource.
5. The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating for the 2012 JORC compliant Resources are:
